

# BLACKLINE LIVE PORTAL

## LEADING SAFETY MONITORING TOOLS

The Blackline Live portal is at the core of all Blackline Safety monitoring solutions, equipping businesses with leading alert management tools, dashboard and comprehensive configuration management of fielded devices. Blackline Live can be accessed from anywhere on an internet-connected device.

The safety status of every team member is visible at a glance using Blackline Live's real-time maps, showing the location and alert status of all fielded devices. Custom floor and site plans work together with Location Beacons, delivering more comprehensive situational awareness where GPS may be unavailable or in and around complex facilities.

Employee-worn monitoring devices are easily configured for specific work environments. Each device is managed in Blackline Live using configuration profiles that make it easy to tailor device functionality to accommodate any need. Devices are configured wirelessly, over-the-air, ensuring they are always up-to-date and working as they should. Alert profiles are also configured through Blackline Live, with documented custom emergency protocols tailored to the device that instruct monitoring personnel how to manage optimized emergency responses. Using address book contacts stored in Blackline Live, personnel know who to call and how to escalate responses, up to and including EMS, fire or police.

Whether you decide to monitor in-house or take advantage of Blackline's 24/7 Safety Operations Center, monitoring personnel use Blackline Live to provide them with critical insights and workflows to manage emergency alerts in real-time. As a cloud-hosted web portal, Blackline Live doesn't require IT approved downloads or costly installation — accessing your account is as simple as logging in. Delivering situational awareness communicated from employee-worn devices in the field, Blackline Live provides all the tools necessary for monitoring personnel to manage a world-class emergency response.

Supporting gas detection programs, G7 devices equipped with gas sensors wirelessly communicate compliance and usage data to Blackline Live for automatic reporting, alleviating the need for manual data collection. From incident through to resolution all activities are time-stamped for future reporting, including notes that are used to document the response.

## FEATURES

Alert management tools

Custom maps & floor plans

Custom alert profiles

Wireless device configuration

Evacuation management

Employee address book

Compliance dashboard

Reporting

## DETAILED SPECIFICATION

### Alert Management

Visual and audible indication of every alert  
Location and identity of the employee plus nearby co-workers (map)  
Document alert activities with notes  
Resolve alerts as a system test, false alert or incident (with or without dispatch)

### Real-time Location Map

Real-time safety status of every team member visible on the map page

### Device Configuration Profiles

Devices configured wirelessly, over-the-air  
Adjust alert functions and sensitivities from any internet connected device

### Alert Profiles

Documented emergency response protocols easily customized for different environments or operating needs  
Identify how monitoring personnel will escalate responses during an emergency  
Notify supervisors by text and email when an alert occurs

### Evacuation Management

Notify and direct a single worker or whole teams to designated muster points  
Trigger a large scale evacuation using mass-notifications  
Monitor the progress of evacuations on a map in real-time from start to finish

### Reporting

Every event is time-stamped and recorded for reporting  
Transparent emergency response-time reporting ensures superior performance standards

### Employee Address Book

Store employee contact information for escalation  
Employees are associated with devices and as notified contacts or emergency contacts within alert profiles

### Alert History

View documented history of every alert  
Review notes, messages to employees and voice recordings of calls to users

### Requirements

Internet connection  
Web browser: Safari, Chrome, Firefox, Internet Explorer, Blackberry Wi-Fi browser

### Dashboard

View real-time equipment utilization  
Address gas detection compliance gaps proactively

### Gas Detection Compliance

Monitor fleet health, see which devices are healthy, have service pending or required  
Schedule and monitor calibration and bump tests  
Map gas events to identify potential hazards
